

Blank CRC Card

Class name: Shark	
Class Attributes:	Class Collaborations (other classes):
• self.image # stores the image of shark • self.rect # defines the position of the shark and its boundaries • self.speed # controls the horizontal moving speed	• Game • Items
Class Methods:	Class Collaborations (other classes):
• __init__() ◦ initializes the shark sprite and position. • update(keys) ◦ updates position based on key input. • move_left() / move_right() ◦ moves shark horizontally within screens boundaries.	• Game • Items

Class name: Items	
Class Attributes:	Class Collaborations (other classes):
• self.image # image for the item. • self.rect # position and collision box. • self.speed # fall speed. • self.type # set by child class by good or bad item	• Game • Shark
Class Methods:	Class Collaborations (other classes):
• __init__() ◦ initializes image, position and speed. • update() ◦ moves item downward making it fall • reset() ◦ moves item to the top of the screen randomly	• Game • Shark

Class name: Good_Item	
Class Attributes:	Class Collaborations (other classes):
• self.type # sets this to good • Rest are inherited from items	• Game • Shark
Class Methods:	Class Collaborations (other classes):
• All from items • Overrides image selection to use good images	• Game • Shark

Class name: Bad_Item	
Class Attributes:	Class Collaborations (other classes):
• self.type # sets this to bad • Rest are inherited from items	• Game • Shark
Class Methods:	Class Collaborations (other classes):
• All from items • Overrides image selection to use badimages	• Game • Shark

Class name: Shark	
Class Attributes:	Class Collaborations (other classes):
• self.image # shark image. • self.rect # defines position. • self.speed # horizontal movement speed.	• Game • Items • Good_Item • Bad_item
Class Methods:	Class Collaborations (other classes):

- `__init__()`
 - sets up shark sprite.
- `update(keys)`
 - moves left/right based on input.

- `Game`
- `Items`
- `Good_Item`
- `Bad_item`
